Lidiana Houro

Data Engineer · SQL, Python, dbt, Power BI

Istanbul, Türkiye · lidiana.h.data@gmail.com · linkedin.com/in/lidiana-houro · github.com/lidianarhoro88 · lidiana-houro.vercel.app

Profile

Data engineer with more than nine years across information systems, data warehousing and business intelligence, mostly in pharmaceutical distribution and construction in Istanbul. I build ETL/ELT pipelines in SQL Server, Python and dbt, model data into tested star schemas, and deliver Power BI dashboards that management uses to track KPIs. I care about the parts that keep data trustworthy: data quality checks, access control, backups and queries that stay fast.

Technical skills

Data engineering	ETL/ELT pipelines, dbt, dimensional modelling (star schema, SCD Type 2), Medallion architecture, incremental and idempotent loads, data quality testing
Databases	SQL Server, PostgreSQL, DuckDB, MySQL, SQLite; Databricks SQL and Apache Spark (familiar)
Programming and tools	SQL, Python (pandas), Git and GitHub, GitHub Actions (CI/CD), Bash
BI and reporting	Power BI (DAX, Power Query), advanced Excel, dashboard design, report automation
Business and systems	SAP ERP, requirements gathering, process modelling, IT project management, data governance

Professional experience

Data & Information Systems Engineer — Jan 2022 – Present
MTE Group · Istanbul, Türkiye

- Led the move from legacy office administration workflows to digital information systems, improving data entry efficiency and accuracy across departments.
- Designed and maintain end-to-end ETL pipelines in SQL Server and Python that aggregate operational and financial data from several business units.
- Implemented a Medallion data-cleaning framework (Raw, Silver, Gold) to validate schemas, remove redundancy and protect data quality.
- Built Power BI dashboards with advanced DAX that give the executive team live KPI and operational insight.
- Manage database access control and data governance, with optimised SQL for secure, low-latency internal reporting.

Founder & Managing Director — May 2020 – Present
RD Group (self-employed) · Istanbul, Türkiye

- Run a small digital-solutions business delivering WordPress web design and development, SEO and branding for international clients.

Project & Data Management Specialist — Nov 2019 – Nov 2021
Alka Pharma Ecza Deposu · Istanbul, Türkiye

- Coordinated cross-functional IT and administrative projects, aligning business requirements with information-system deliverables.
- Modelled star schemas with fact and dimension tables to centralise supply chain, procurement and CRM data.
- Produced weekly and monthly performance reports in advanced Excel (PivotTables, Power Query) to surface operational bottlenecks.

Data Warehouse & Database Analyst Oct 2017 – Oct 2019
Alibaba Ecza Deposu Dış Ticaret A.Ş. · Istanbul, Türkiye

- Translated pharmaceutical business requirements into relational database models, improving data retrieval efficiency by 30%.
- Defined data administration rules, recovery procedures and backup policies, increasing database reliability and availability by 25%.
- Wrote optimised SQL queries, stored procedures and scripts to automate data cleansing and speed up reporting.

Information & Administrative Coordinator Sep 2016 – Sep 2017
Enisler Group · Istanbul, Türkiye

- Supported senior executives with market research and data-driven summaries.
- Designed digital filing systems for consistent information flow across teams.
- Standardised presentation materials, invoices and performance tracking.

Selected projects

Pharma Distribution Analytics · dbt + DuckDB · lidianarhoro88.github.io/pharma-distribution-dbt/
dbt + DuckDB star schema for a pharma distributor: SCD Type 2 pharmacy history, 39 data tests, OTIF and expiry-loss marts. Found the European-side warehouse at 83% on time and 10 SKUs causing 45% of expiry loss.

TCMB FX Rates Pipeline · lidianarhoro88.github.io/tcmb-fx-rates-pipeline/
Incremental, idempotent daily load of Central Bank of Türkiye FX bulletins on GitHub Actions: watermark, holiday detection, retries, quality checks, live dashboard. 205 bulletins, 0 failed days.

Construction Cost Control · Earned Value · lidianarhoro88.github.io/construction-cost-control/
Earned value model in DuckDB SQL for six construction projects (PV, EV, AC, CPI, SPI, EAC, TCPI) with a live dashboard; separated a cost overrun (steel, CPI 0.90) from a schedule slip (SPI 0.67).

Invoice Intake Automation · github.com/lidianarhoro88/invoice-intake-automation
Python pipeline that reads Turkish supplier PDF invoices, validates them against vendor and PO master data with 14 rules and books clean ones to SQLite; 29 booked, 11 routed to review.

CSV Data Profiler · github.com/lidianarhoro88/csv-data-profiler
pip-installable data quality tool: type inference, duplicate and label checks, quality score, offline HTML report and a CI quality gate.

Logistics Performance Analytics · github.com/lidianarhoro88/logistics-analytics-sql-powerbi
Layered SQL Server pipeline and Power BI report for a delivery company: on-time rate, failure rate and driver-level drill-down.

Education

Bachelor of Technology (BTech), Computer Systems Engineering Graduated 2016
Cordoba Private University (formerly Mamoun Private University) · Aleppo, Syria · taught in English

Certificates

Data Modeling in Power BI · Microsoft · Coursera, Jul 2026
Data Analytics Job Simulation · Deloitte Australia · Forage, Jul 2026
Data Analysis Using Excel and Power BI (Reporting), 90 hours · Alaa Essam Academy, May 2026
Project Management Essentials · IBM · Coursera (Credly badge), Dec 2025
Foundations of Business Analysis · SAP · Coursera, Sep 2025
Google Analytics for Business · Google, Apr 2020
SQL Foundations · Microsoft · Coursera, Jul 2026
Data Analysis and Visualization with Power BI · Microsoft · Coursera, Jun 2026
Business Process Modeling and Analysis · SAP · Coursera, Dec 2025
Requirements Gathering and Documentation · SAP · Coursera, Nov 2025
Preparing Data for Analysis with Microsoft Excel · Microsoft · Coursera, Jul 2025
